

BLUEBEAM® REVU® Mobile Applications

Length: 2 hours
Level: Beginner
Prerequisites: General knowledge of personal computers and mobile devices
Delivery: Virtual Only
Class Size: Three Student Minimum

DESCRIPTION

This fast paced two-hour course is devoted to Bluebeam users on Mobile devices. The class includes a general overview of all the currently released Bluebeam mobile apps as well as some server side information for those managing accessible projects. Students will learn what is and what isn't possible with the mobile apps. Once informed you'll be able to get the most out of Bluebeam no matter where you are working or what device you are working on.

CONTENT
